

## Our Company

Founded in 1974 in Salaberry-de-Valleyfield, Quebec, Meloche Group specializes in precision machining, surface treatment, painting, assembly, and manufacturing engineering for the aerospace and defence industries. It has four manufacturing plants located near Montreal, 150 employees, and more than 25 CNC machining centers. The company generates more than \$35 million in annual sales.

## Our services:

- Aluminum and titanium aircraft structural components
- Aluminum, titanium, inconel, and stainless steel aircraft engine components
- Manufacturing and engineering of components and sub-assemblies
- Complex five-axis machining

Through its vertical integration of CNC machining, NADCAP special processes and assembly, Meloche Group is in a position to achieve world-class levels in terms of quality, on-time delivery, and manufacturing cycles. A continuous improvement process allows the company to constantly reduce production costs, which helps its clients remain globally competitive.

Recognized by aerospace leaders as a reliable and just-in-time partner, Meloche Group has recently put in place cutting-edge management tools, a strategic development plan, and ambitious investment projects. This shift will allow Meloche to continue its growth while cultivating its recognized human values and corporate citizenship.
